

CB-EFFEX (450mg or 900mg)

Our CB-EFFEX is designed to help support:

- Management of moderate to more serious stressors
- Post-workout recovery
- Optimal performance
- A sense of calm and relaxation

FULL SPECTRUM HEMP OIL

Due to the vast amount of Hemp products to hit the marketplace, Dr. Hoffman wanted to ensure that his patients received the best he could find. That's why we are proud to offer CB-EFFEX Full Spectrum Hemp oil. The 500-acre farm where CB-EFFEX comes from was also the first legal hemp farm operation in Kentucky, where the farmers grow hemp in healthy conditions. While our CB-EFFEX supplier sources its extracts from plants grown and processed on American soil, the hemp seeds are imported from Australia, where their scientists, geneticists, and farmers work to develop genetically superior strains of hemp. This leads to a superior, quality product you can count on.

Overview

Hemp oil is non-addictive and, with less than 0.3% THC, is non-psychoactive. Our full spectrum oils also contain cold-pressed hemp seed oil, for a truly plant-based ingredient list with a wide range of potential benefits such as sleep issues, anxiety, pain, inflammation and more. As always, consult your healthcare provider to see if hemp extracts are right for you. *Available in 450mg and 900mg bottles.*

Full Spectrum Hemp Oil

Cannabinoids are part of a class of diverse chemical compounds that act on receptors in the human endocannabinoid system (ECS). Unlike THC, CBD and other cannabinoids are non-psychoactive. Full spectrum refers to a range of beneficial cannabinoids (such as CBD, CBC, CBG, CBN etc), terpenes and phytonutrients that occur naturally in a hemp plant. We believe and research shows that these compounds work synergistically together to create much better results than using a CBD isolate.

Hemp Oil vs. CBD Oil

The primary difference between hemp oil and CBD oil is where the oil itself is derived from the hemp plant. Hemp oil is derived from the seeds of the hemp plant only. CBD oil is derived from the stalk, stems, leaves or flowers of industrial hemp plants. The only part of the hemp plant that doesn't contain CBD oil is hemp seed. What is the difference between cannabis, industrial hemp and marijuana? Cannabis Sativa L is like the family. Then under that family there are two groupings. Hemp and marijuana are species from the Cannabis Sativa L plant. There is no difference between CBD that is extracted from the two. CBD is CBD whether it comes from hemp or marijuana.

Soft Gels for Convenience and Ease

You can't go wrong with our CB-EFFEX Softgels - a great formulation in a convenient, easy-to-swallow capsule. Each softgel is an exact dose of 15mg so it takes guessing the dosage out of the equation. CB-EFFEX is ideal for those new to CBD, those on the go or those who are looking for the precision and convenience of a capsule.

- 450mg/900mg of active cannabinoids per bottle
- 30/60 softgels per bottle
- 15mg active cannabinoids per softgel
- Full Spectrum of cannabinoids
- Carried in organic, cold pressed hemp seed oil
- Plant-based ingredients
- Small batch to batch quality control
- Naturally grown, processed and packaged in Kentucky
- Non-GMO and certified glyphosate-free

For any of our CBD products, we can offer a detailed Certificate of Analysis that clearly and scientifically proves the quality of the product.

CBD Benefits

There is an extensive list of conditions that CBD can be used to help maintain. This includes, but is not limited to, anxiety, depression, insomnia, arthritis, chronic pain, inflammation, epilepsy and more.²⁻⁴ The rise in popularity of CBD oil has caused scientists to gather further evidence on the healing powers of this natural, plant-based product and to continue exciting studies. Research is continually emerging and we are always learning more about the diverse benefits of CBD oil. For more information about CBD oil and your symptoms and/or condition, ask Dr. Hoffman or another healthcare professional.

Dosing Recommendations

Dosage varies greatly for each individual. It is necessary to find the dosage that is right for you. We suggest starting with one softgel (15mg) in the evening, preferably with food. Monitor how you feel for a day or so at this dose. If you feel you need more, you can take another softgel 12 hours later. Softgels can be taken in the morning or at night, or both. For the best results, take consistently, daily and preferably after a meal.

Talk to your healthcare professional for more information.

Storage

Store in a cool, dry place (product does not need to be refrigerated)

Ingredients

Premium Flower Extract
Raw, Organic Cold-Pressed Hemp Seed Oil
Sustainably Sourced Gelatin
Glycerin

Cautions

This product is not for use by or sale to persons under the age of 18. This product should be used only as directed on the label. It should not be used if you are pregnant or nursing. Consult with a physician before use if you have a serious medical condition or use prescription medications. A doctor's advice should be sought before using this and any supplemental dietary product.
